

# Trade Advisor Pro™

Use the sheet below to pre-calculate the number of lots you will be trading on your trades. Knowing in advance EXACTLY the number of lots you will trade on each trade will help you stick to your equity and risk management rules.

Here is how you calculate:

- 1) \_\_\_\_\_% Risk per trade per your risk management game plan
- 2) \$\_\_\_\_\_ Your account balance
- 3) \$\_\_\_\_\_ Dollar amount you will risk per trade based on 1 and 2.
- 4) Calculate distance between open price and stop below. #3 into this number, then divide that number by \$.10....which is 1 micro lot. Then enter the number below to determine the exact number of micro lots you will trade on different stop loss levels.

When complete print this form, cut out the lot sizes and keep on your computer. DO NOT MESS WITH THESE LOT SETTINGS!

<b>STOP LOSS 30 PIPS</b>	<b>LOTS USED _____ MICRO LOTS</b>
<b>STOP LOSS 40 PIPS</b>	<b>LOTS USED _____ MICRO LOTS</b>
<b>STOP LOSS 50 PIPS</b>	<b>LOTS USED _____ MICRO LOTS</b>
<b>STOP LOSS 60 PIPS</b>	<b>LOTS USED _____ MICRO LOTS</b>
<b>STOP LOSS 70 PIPS</b>	<b>LOTS USED _____ MICRO LOTS</b>
<b>STOP LOSS 80 PIPS</b>	<b>LOTS USED _____ MICRO LOTS</b>
<b>STOP LOSS 90 PIPS</b>	<b>LOTS USED _____ MICRO LOTS</b>
<b>STOP LOSS 100 PIPS</b>	<b>LOTS USED _____ MICRO LOTS</b>
<b>STOP LOSS 110 PIPS</b>	<b>LOTS USED _____ MICRO LOTS</b>
<b>STOP LOSS 120 PIPS</b>	<b>LOTS USED _____ MICRO LOTS</b>
